

1- PROJECT OVERVIEW :

(Summary of general information about the project)

Our mission is to provide the public with high quality agricultural products, rich in vitamins and proteins. Our products are distributed to supermarkets, hotels, restaurants, informal markets and processing companies. We have been working in these areas since 1999. Also serving as a source of employment for local low-income communities to combat poverty.

2- OBJECTIVES :

(Summary of the main objectives of the project)

Vegetable production for low-income consumers in the province or districts.

Our market has experienced a shortage and prices are increasing for the most basic products we offer, such as beans, cereals, tomatoes, potatoes, etc. We fill this gap by providing fresh, high quality products at affordable prices.

3- VISION :

(Short, medium and long term view of the project)

Promote research and training on sustainable development of agricultural productivity;
Cost reduction in farming, agricultural mechanization and consequently in the vegetables produced;
Provide consultancy in agriculture to disseminate technological innovation to the producer through integrated extension activities.

Self-process products on your own and achieve the quality of the products we seek.

4- BUDGET :
