Project: **CREATION AND SALE OF CHICKEN**

Applicant: **Cadre Mitilage**

Pemba February, 2021

I. PROJECT OVERVIEW

Broiler Breeding is a project that aims to create and sell broiler chickens on a small scale in the municipal district of Josina Machel in the city of Pemba, thus contributing to the food chain and job creation within the local community.

II. GOALS

General: The main objective of the project is to raise and sell chickens, in the city of Pemba in general and in the community of the Josina Machel neighborhood and in the surrounding areas in particular, with the prospect of increasing income, food and nutritional security as well as job creation.

III. EYESIGHT

-  **Short term:** increased production and productivity of chicken meat, as well as increased consumption of chicken meat, ensuring the improvement of food and nutritional security in the communities, from 2021-2022;
-  **Mid-term:** Increase in supply and revenues, contributing significantly to corporate income;
-  **Long term:** by 2025, reduce the rate of local unemployment, contribute to the increase of the domestic GDP for the country, contribute to the reduction of imports, increase of revenues, and foreign currency of the enterprise.
