

**1- PROJECT OVERVIEW:**

KF Eggs is a new laying hen breeding company with the purpose of producing and selling eggs for consumption, which will operate in the province of Nampula, Malema District, specifically in the Neoce Region.

The project intends to start egg production in an infrastructure built and equipped with material for technological use, that is, with 1 battery of laying hen cages (of 120 hens per battery), in a first phase with 120 birds. The infrastructure that is intended to be built beyond the pavilion, will comprise an egg collection room, storage room and inputs, an estimated 5m wide, 10m long and 4m high. There will also be a control and regulation system for lighting, water and temperature.

**2- OBJECTIVES:**

- 

- 

- 

- 

- 

- 

- 

- 

- 

- 

General Objective

- 

- 

- 

- 

- 

- 

- 

-

- 

- 

- Produce consumer eggs for sale.

  - 

  - 

  - 

  - 

- 

- 

- 

- 

- 

- 

- 

- 

Specific objectives

- 

- 

- 

- 

- 

- 

- 

- 

- 

- 

- Acquire a battery of cage and laying hens in the laying phase;

  - 

  - 

  -

- 

- 
- 
- 
- 
- 
- 
- 
- 
- 

- Make the chickens permanent management to qualify egg production;

- 

- 
- 
- 

- 
- 
- 
- 
- 
- 
- 
- 
- 

- Market the eggs produced.

**3- VISION:**

- Be a market reference in the city.
- Be recognized for offering products of quality, variety and fair price.

**4- BUDGET:**

- 
- 
-
