

Project name: Benga Coal Thermic Central with capacity of 450 MW

City/Country: Tete / Mozambique

Project Category: Investment and engineering

Project description: Mozambique is a net exporter of energy (electricity, gas and coal). It is strategic power generation project-Construction of Benga Coal Thermal Power Plant construction of electrical thermic centre and increase energy availability for supply expansion of the power supply, Maximize the usage of AC OTL and future 500kV HVDC TL Tete-Maputo, Chimuara-Nacala and Interconnector MOTA,MOMA and MOZA point of the interconnector-The Cataxa Substation Pre-feasibility studies concluded by the Gov. Ongoing Feasibility studies

Cooperation requirements: Potential partners

Amount (USD): 1,300M

Industry involved: Electric energy

Project organization: EDM and MIREME
